

~~S~~ Solucion de Problemas de Párrafo del 2

$$X=2$$

$$b=X=2$$

$$2 = \frac{2}{2}$$

$$B = 0.5 \left(\frac{2}{2} + 2 \right) = 1.5$$

$$1.5 = \frac{2}{1.5}$$

$$b: 0.5 \left(\frac{2}{1.5} + 1.5 \right) = 1.41666$$

$$1.41666 = \frac{2}{1.41666}$$

$$b = 0.5 \left(\frac{2}{1.41666} + 1.41666 \right) = 1.41421$$

$$b = 1.41421 = \frac{2}{1.41421}$$

$$1.41421 = 1.41421$$

haz De 2 es 1.41421
